Step 3: Rights and pricing

- **Territories:** All territories (worldwide).
- **Marketplace:** Amazon.co.uk (or your main one).
- **Prices per marketplace:** set each one yourself. Don't tick "base on Amazon.com price", because converted prices can land just under the 60% royalty line.

Marketplace	Price to enter
Amazon.com (USD)	9.99
Amazon.co.uk (GBP)	7.99
Amazon.de / .fr / .es / .it / .nl / .be (EUR)	9.99 each
Amazon.pl (PLN)	41.99
Amazon.se (SEK)	119
Amazon.co.jp (JPY)	1,200
Amazon.ca (CAD)	13.99
Amazon.com.au (AUD)	13.99

These sit at or just above Amazon's 60% royalty line (below it you only get 50%). Check that the royalty KDP shows beside each price is positive. - **Expanded distribution:** optional. It reaches bookshops and libraries, but pays a lower royalty.

Checks already done on these files

- Interior: 64 pages (even, above the 24-page minimum), every page exactly 8.5 × 11 in, no bleed.
- All artwork sits at least 0.5 in inside the page edge, well within KDP's margins.
- Cover: 17.3941 × 11.25 in = 0.125 in bleed + 8.5 in back + 0.1441 in spine (64 pages × 0.002252 in, white paper) + 8.5 in front + 0.125 in bleed. This matches KDP's cover calculator for this setup.
- There's no spine text: KDP only allows it on books over 79 pages.
- The bottom-right of the back cover is left clear for the barcode KDP adds.
- The PDFs contain **no fonts** (all lettering is drawn as shapes), so nothing can be "not embedded".
- All artwork is original: no brands, logos or existing characters. The lettering font is Fredoka, which is licensed for commercial use (SIL Open Font Licence, `fonts/fredoka-LICENSE`).

Remember: if you change the page count or paper type, the spine width changes, so the cover must be rebuilt (`npm run build`).
